Our nifty and mobile display at the SLA Conference in Toronto.

Thank you to all conference attendees.

We enjoyed meeting many of our clients at the CHLA, SLA and CLA conferences last month - some for the first time - it's always nice to put a face to a name! Thank you for stopping by our booth to go over new possibilities and for taking the time to give us feedback on your needs.

WebPublisher PRO: Beyond the Basics Workshop.

SLA Delegates were treated to a stimulating workshop given by Andornot Consulting. The half-day workshop titled "**WebPublisher PRO: Beyond the Basics**" offered current Inmagic WebPublisher PRO clients the chance to learn various techniques for enhancing their web interfaces. Fourteen Inmagic users attended the workshop lead by Andornot's dynamic team of **Denise Bonin** and **Peter Tyrrell**. The workshop consisted of an overview of using Cascading Style Sheets (CSS), javascripts for navigation and usability, and various examples and helpful tips for web based editing.

At the end of the workshop, participants were given a sample WebLinks textbase and a selection of scripts to provide additional control over the standard WebPublisher PRO output. Feedback from the workshop was positive and enthusiastic. One participant said, "We need more of this kind of thing. There are not enough opportunities to learn how to move beyond the box." Peter Tyrrell and Denise Bonin received high ratings as workshop presenters - "they kept a complex topic light and interesting..." "We want more!..." "Make the workshop longer!"

We plan to hold similar workshops in the Fall. [Contact us](#) if you would like to have a workshop in your city.

Inmagic Day at SLA

The afternoon session consisted of a panel discussion where Inmagic users had the the opportunity to hear how customers have used Inmagic technology to solve specific business problems. Among the panel members were Barbara Holder from Forintek presenting on the Value Added Wood Pathfinder application developed with Andornot; Jennifer McNenly from Osler, Hoskin & Harcourt; Karen Evans from the Anglican Church of Canada; and Brad Dishan of St Joseph's Health Care.

Phil Green, CEO of Inmagic, Inc. spoke about future plans and the latest product developments including Genie Version 2.0 enhancements.

Inmagic Notes

Service packs have recently been released for WebPublisher PRO version 8 and Content Server 1.3. These contain timely fixes for specific issues prior to their incorporation in the next version. Details on these are available from the [Inmagic website](#) .

Clients with single user licenses; or a 2,3, or 4 node network license of DB/TextWorks can upgrade to a 5 node license for a

discounted price until September 27th, 2005. [Contact us](#) for details on this or any other upgrade pricing.

Inmagic has recently revised their website and some popular pages have new URL's. In particular, the Knowledgebase and the Forums are now accessible from the [Inmagic Support Overview](#) page.

New Online Catalogues

Andornot is proud to present the launch or redesign of some our client's online catalogues using Inmagic's **Web Publisher Pro**. A BIG thank you to all those who were involved in helping envision and design these resources from the ground-up.

[Fraser Health Authority Library Catalogue](#)

This site redesign uses our [Web Publisher Developer Kit](#) (WPKD) to allow users to request items from the library. The project also involved merging three separate catalogues and handling multi-library web requests. The site is designed for FHA staff and matches the FHA intranet.

[Vancouver Coastal Health Library Catalogue](#)

This site redesign involved incorporating two additional catalogues converted from other library management systems plus adding a shopping cart ([WPKD](#)) to request items as for Fraser Health.

[PARC Library Catalogue - AIDS Vancouver](#)

This is a new site also featuring our [WPKD](#) for users to request items plus canned searches for topics on the Quick Search page. (Official launch will be in July).

Tier 1 CRC Research Laboratory For Chronic Illness - University of New Brunswick, Faculty of Nursing

Data was converted from EndNote and our E-mail/Save/Print application was set up with checkboxes to allow the selection of records across pages and searches.

[Glenbow Museum & Archives \(Alberta\)](#)

The web developers for this project purchased our [WPKD](#) to customize the interface and add shopping cart functionality.

[Diversity Health Institute Clearinghouse \(New South Wales, Australia\)](#)

Another implementation of our [WPKD](#) with all work being handled by the client.

[Contact us](#) if you would like more information about these solutions and how they can enhance your online presence.

Rex Turgano on the cover of Alternatives Journal

This July, our very own Rex Turgano is featured on the cover of [Alternatives Journal](#) as part of a special issue about environmental success stories from across Canada and around the world. Rex's award-winning web site, [thegreenpages.ca](#) was originally developed from his campus residence at the University of Waterloo and since then, Rex has continued to build this online resource for Canadian's to share and access environmental information. Alternatives is Canada's foremost journal of the environment, which six times a year serves up provocative features, current news updates, analytical commentary and topical book reviews.

In memory of a friend

Nathan Mayr, died on May 31st in a traffic accident when a car pulled out in front of his motorcycle. Nathan had been an integral part of the Andornot team since 1998 and we are all deeply affected by his death. We have lost not only a friend, but a superb web developer and a constant source of innovative ideas and solutions.

We ask for your understanding and patience while we reschedule projects and get through this difficult adjustment period.

 **NATHAN MAYR**
1976 - 2005

Andornot website re-design

Our new [website](#), designed primarily by Nathan, was launched earlier last month. It features a completely fresh look, more information on many of our [add-on products](#), a new sitemap and a redesigned WebPublisher Links database interface. We have plans to add a site search plus more FAQ sections. Feedback is always appreciated!

Don't forgot to read our Andornot Developer's Blog!

A new feature of our website is the rants and musings of our developers and consultants -
