

Newsletter - November 2005

In this issue:

- [Andornot 10 year anniversary](#)
- [Users Group Meetings](#)
- [Inmagic Notes](#)
- [New and updated websites](#)
- [Tips & Hints](#)
- [Job Opportunities](#)

Andornot celebrates our 10th anniversary!

Yes, time flies when you are having fun! As we approach our 10 year anniversary this November, it is fitting to take a look back, reflect on accomplishments, and plan for an exciting future. Watch the [5 minute short-film](#) created and narrated by our own Peter Tyrrell for a trip down memory lane. A notice with the date of our celebratory reception in Vancouver will be sent out early in the new year.

A heartfelt thank you to all our loyal clients who have made our success possible.

Upcoming user group meetings

Come and see a demonstration of [Genie version 2](#) and other neat new websites. We will be available to answer questions on the latest Inmagic announcements and on other Inmagic products, pricing or maintenance subscriptions.

Calgary: Nov. 17th, 2005. 12-1:30pm

Talisman Energy. 3400, 888 - 3rd St. S.W. Calgary. Please check in at the reception desk on the 34th Floor.

Email [Cathy Ross](#) to attend.

Vancouver: Nov 21st, 2005. 4-6pm

Lang Michener, Royal Centre, 1055 West Georgia Street, Suite 1500, Vancouver.

Email [Anne Ikeda](#) to attend.

Inmagic Notes

- **Version 9 of DB/TextWorks and WebPublisher PRO announced.**

Check out the proposed [new features](#) due for release in December.

- **Version 2 of Genie now shipping**

Inmagic is now shipping [Version 2](#) of Genie to new clients. Existing clients will receive their maintenance notifications with download information once the conversion utility is finalized.

- **Special offer to Dec 23, 2005.**

Clients with single user licenses; or a 2,3, or 4 node network license of DB/TextWorks can upgrade to a 5 node license for a discounted price until December 23rd, 2005. See [our website](#) for more info.

- **Important notice for clients with older versions.**

Inmagic has announced a change in their pricing policy for upgrades and maintenance subscriptions for older versions. Starting in 2006, there will be three tiers of pricing - renewal; non renewal for customers within two revisions of the current version; and a higher, negotiated price for customers with older versions. As version 9 is expected by the end of 2005, this will mean that clients with version 6 and older will have to pay more to catch up next year. [Contact us](#) now for a quote to renew before the price goes up.

- Check out the [Inmagic Autumn 2005 Newsletter](#) for more details.

New and updated websites

Andornot is proud to present our latest designs and launch of online catalogues and other applications using Inmagic's **WebPublisher Pro**.

[NonprofitsCan.ca - Imagine Canada](#)

Imagine Canada's NonprofitsCan.ca web site is one of this year's multifaceted projects. Along with implementing a new web site template, our [EmailSavePrint \(ESP\)](#), we also developed a Ratings Add-on

module where users can submit comments and rate resources and provide comments on their usefulness. We also added a web based Administration area where ratings and comments can be reviewed and approved to be displayed along with each catalogue record. Finally, we also created Imagine Canada's "Special Collections" catalogues which are subsets of their catalogue each having their own search interface.

[Print Health Education Materials \(PHEM\) Resource Catalogue for Vancouver Coastal Health.](#)

The PHEM catalogue is designed for a staff, doctors, community agencies and the public. It provides access to PDF's of commonly requested pamphlets on topics such as after surgery care, common medical procedures etc. Doctors offices and other agencies can order multiple copies of pamphlets through the shopping cart developed using our [Web Publisher Developer Kit](#) (WPKD). Staff can search the catalogue and order from the internal VCH Printing Services using a link embedding the catalogue numbers and quantities

[BRAINlinks @ Mohawk College](#)

BRAINlinks is a database of Recommended Web Resources produced by the Mohawk College Library. You can browse by subject (using canned searches) as well as a perform Quick and Advanced searches. Using our [EmailSavePrint \(ESP\) Add-on](#), you can also check off resources and view your selections to Email them to either yourself or to a colleague; **Save**; or **Print** your list. Click on one of the Topic Searches and notice there are actually 2 results sets on one screen. The first showing just appropriate See Also references and the second showing a brief record.

[WorkSafeBC - Workers' Compensation Board of BC](#)

"Simple is better" was the main theme for this site, which uses our [Web Publisher Developer Kit](#) (WPKD) Page Template layout system. This project also involved converting and importing data from WCB's original library automation software SydneyPLUS. We are currently hosting WCB's web catalogue and updating it monthly from their Inmagic Genie OPAC system.

[College of Registered Nurses of British Columbia \(CRNBC\)](#)

The CRNBC web site (formerly the Registered Nurses Association of British Columbia) is another web site redesign project with an update to use our [WebPublisher Developer Kit](#) (WPKD) and Shopping Cart. Our latest WPKD version includes a "Blacklist" feature where the "Add to Cart" option is omitted in the search results page if there are certain values in a field (ie. Loan Policy = Library Use Only; Record Type = Reference).

[Contact us](#) or visit our [web site](#) if you would like more information about these solutions and how they can enhance your online presence.

Tips & Hints

Saving your Validation and Substitution Lists

Have you ever wondered how you can save your Validation and Substitution Lists in an electronic file format? It is easy! Simply view and edit the field's validation/substitution list, select "Print List" and check the "Print to File" check box. You will then be prompted to save the file and location in a text (.txt) file format. These lists can then be imported into other databases or edited in a text editor or word processor and the original replaced.

Running multiple websites with XP PRO

[IIS Admin](#) is a beautifully simple tool for web development on an XP PRO workstation that allows you to mimic multi website functionality. You can create a directory structure for each client project that actually replicates their real-life site from the web root down.

Job opportunities

Andornot is looking for a contractor or full time employee to join our team. We have a full slate of projects on the go and demand for our consulting services has never been higher. We suspect the ideal candidate does not exist, but please [contact us](#) if you have any of the following skill sets and would be interested in joining our innovative team: advanced HTML and web design; ASP.Net application design; Inmagic or dtSearch experience; MSDE/SQL Server; XML/XSLT's.

Excellent communication skills, understanding of software development projects and adherence to coding standards are essential.

Don't forgot to read our Andornot Developer's Blog!

A popular feature of our website is the rants and musings of our developers and consultants -
